Here's your Free Guide.....
This is **DAY 9** of the *AI Creator Series*

AIKAMI

Code-Drawn Animation — Every Frame Drawn By Claude

★ **NOTE** - These Guides are manually hand-typed sauce and Not AI written robotic fluff :)

But how does Claude make these animated videos?

1. No AI video tool is involved: Claude writes code that draws every frame.
2. It studies your references and copies the style, not the subject.
3. It plans a mini-film: a hook, a build-up, a payoff.
4. Chrome, already on your computer, turns the code into frames.
5. Claude checks sample frames and fixes what looks off.
6. It composes the soundtrack in code, synced to the picture.
7. A free tool (ffmpeg) joins it all into a ready-to-post MP4.

AIKAMI

1 Find A Style You Love

- **STYLES THAT TRANSLATE BEST TO CODE:**

Code draws shapes, lines, gradients and textures brilliantly. Pick styles built from those, and the results look hand-crafted:

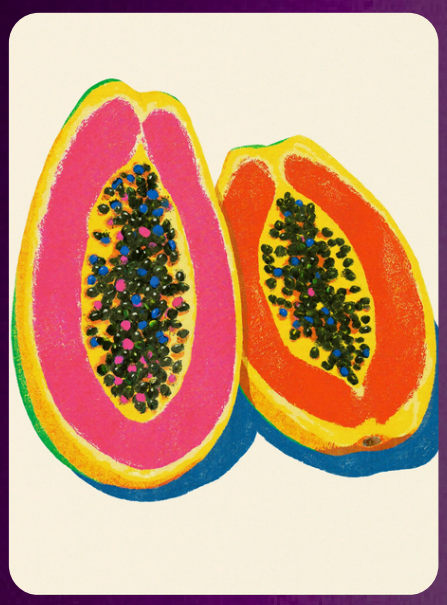

Flat vector illustration

Minimal line art

Paper-cut / layered

Grainy risograph

Skip photorealism for this workflow — that's a job for video models. Code wins on graphic, illustrated, designed looks.

2 Load The Skill + Give Your Brief

A rough idea is enough. The skill does the directing.

★ THE AIKAMI ANIMATION SKILL :

https://drive.google.com/drive/folders/13r4IY7X13Wj4cpd3-U8pmvUv4ttg6IT0?usp=sharing

1. **Click and download** the skill above 👆.
2. Install Claude Code app on your desktop (dont use on web)
3. Then drag and drop the **skill.md** file in Claude code and say “Install this as a personal skill”
4. Then open a new chat (cz the same chat might wont detect that claude skill u just installed)
5. Then type /motion-studi... (ull already see the skill and select it)
6. Then upload your references (imgs or videos) {They act as style reference but can add further instructions if want the subject or something specific from it}
7. Along with a rough idea of the topic, you want animation video on.
8. Mention the Duration and Ratio and let it cook!

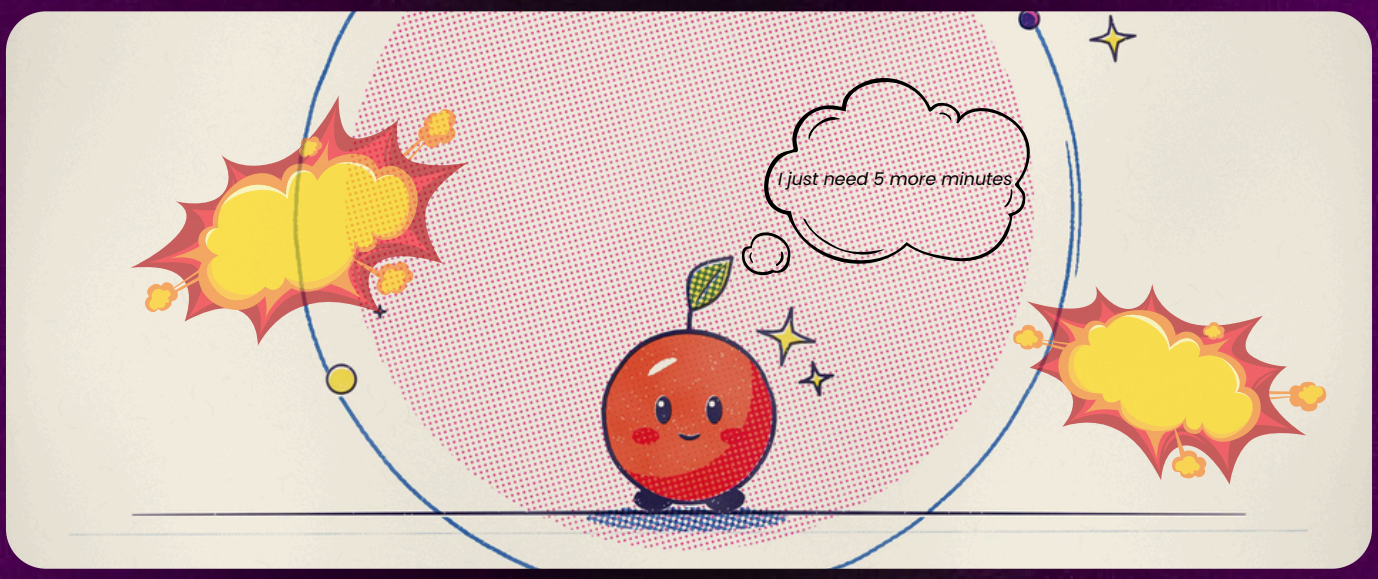

AIKAMI

3 My honest insights on this method:

1. Claude code at least takes 25-30 minutes for one 15 second animation to build completely, could be even more than that depending on your input.

2. You will hit your claude daily usage limit sooner than expected, claude code uses a bit of GPU to render the animations so keep checks in between.

3. For best results and usage balance use Opus 5.5 on high and 15 sec duration

★ Feel free to DM me if you have any questions ★

★ ***I'll keep dropping valuable guides like this for free. But if you ever want the full in-depth system behind work like this, that's what AIKAMI's Vault is for.*** ★
